

# Colonoscopy Split Prep Instructions (includes Colon w/EGD)

A Colonoscopy is a procedure that enables your physician to examine the lining of the colon (large bowel) for abnormalities by inserting a flexible tube with a camera on the tip into the anus and advancing slowly through the rectum and entire colon.

#### **ONE WEEK BEFORE Your Procedure:**

#### **Those on Diabetic Meds:**

- Discuss with your diabetes physician the clear liquid diet required and see if you need to adjust your insulin.
- If you are taking canagliflozin (Inovokana), dapaglifloxin (Farxiga), or empagliflozin (Jardiance), **HOLD for 3 days prior to procedure.**
- If you are taking ertuglifloxin (Steglatro), **HOLD for 4 days prior to procedure.**

## **Those on Blood Thinners:**

• Warfarin (Coumadin), Heparin, Plavix, and Pradaxa, must be stopped 5 days prior to procedure. Eliquis, and Xarelto must be stopped 2 days prior. Lovenox must be stopped 24 hours prior. Check with your prescribing physician that it is safe for you to do so.

**<u>5 days prior</u>**: No nuts, seeds, popcorn, corn. No oral iron supplements.

## Purchase the Bowel Prep from your Pharmacy:

 Provider-prescribed Bowel Prep Rx (optional flavoring with Crystal Light – no red or purple in color). \* see below

#### The DAY BEFORE Your Procedure:

- Drink plenty of CLEAR liquids ONLY for the ENTIRE day. ALLOWED clear liquids are water, bouillon, broths, black coffee, Jello, popsicles, sports drinks and soft drinks.
- NO SOLID FOODS.
- Do NOT consume anything <u>red</u> or <u>purple</u> in color, anything with <u>dairy</u>, or alcoholic beverages.
- Mix Bowel Prep with water according to package directions and chill in refrigerator.
- Late afternoon, begin drinking bowel prep, 8 oz (8 oz = 1 cup) every 10-15 minutes, completing ¾ of the prep (3/4 = 12 cups) within 5 hours.\*

## The DAY OF your procedure:

- In the morning, continue drinking the last ¼ of bowel prep (1/4 = 4 cups) at least 4 hours before procedure. \* see below
- STOP all clear liquids 3 hours before procedure.
- Take all routine blood pressure, heart, and seizure medications with a sip of water.
- A RESPONSIBLE ADULT (18 years or older) MUST accompany you and remain with you to DRIVE YOU HOME from your procedure due to sedation effects.

<sup>\*</sup>If using Suprep, Clenpiq, Moviprep, or Sutab follow package directions for divided doses

advance to avoid a **\$100.00** charge.
