

EMORY MUSCULOSKELETAL RADIOLOGY

Emory Radiology's Musculoskeletal Division, located at Executive Park in Atlanta, offers advanced diagnostic imaging to evaluate the musculoskeletal system. The division, which is responsible for interpreting musculoskeletal studies for much of the EMORY HEALTHCARE system, offers a complete array of services and procedures with state-of-the-art facilities at the Emory Orthopaedics & Spine Center, The Emory Clinic, Emory University Hospital and Wesley Woods Center.

The Musculoskeletal Radiology team is comprised of three faculty members and two fellows who are board-certified radiologists specializing in musculoskeletal imaging, as well as rotating residents. Collectively, the team has more than 50 years of experience. In addition, our highly trained, experienced technologists, who perform only musculoskeletal imaging, are skilled in producing the highest quality images.

Used exclusively for musculoskeletal imaging, a 3.0-Tesla magnetic resonance scanner (3.0T MRI) was recently installed, with the most current software available. The new 3.0T MRI gives Emory radiologists the ability to detect smaller injuries and subtle abnormalities, which may permit earlier intervention and prevention of progressive diseases.

Radiology and diagnostic imaging equipment available at the Emory Orthopaedics & Spine Center also includes a multi-slice computed tomography scanner (CT) with 3-D imaging.

Offering world-class patient care, clinical expertise and innovative research, our physicians are leaders in the field. Emory investigators and educators train musculoskeletal radiologists as part of an established fellowship program and are involved in various aspects of musculoskeletal imaging research.

Radiology and diagnostic imaging services available at the Emory Orthopaedics & Spine Center:

- Multi-slice CT with 3-D imaging
- 3.0T MRI
- 1.5T MRI
- Fluoroscopy and arthrography
- General X-ray

To schedule an appointment, please call: 404-778-6966

Emory Musculoskeletal Radiologists

Michael R. Terk, MD
Professor of Radiology, Emory University School of Medicine; Director of Musculoskeletal Imaging for the Emory Orthopaedics & Spine Center and the Emory Department of Radiology
 Medical School: University of Wisconsin Medical School

Internship & Residency: Los Angeles County-University of Southern California Medical Center

Fellowship: The University of Southern California Medical Center (Radiology and MRI)

Board Certified: Diagnostic radiology, subspecializing in musculoskeletal imaging

Special Interests: High-resolution MRI; musculoskeletal MRI of foot, ankle and cartilage; imaging of rheumatic disorders and Gaucher's disease

Year Started Practicing at Emory: 2007

Walter Carpenter, MD
Assistant Professor of Radiology, Emory University School of Medicine
 Medical School: Emory University School of Medicine

Internship & Residency: Emory University Affiliated Hospitals

Board Certified: Diagnostic radiology,

subspeciallying in musculoskeletal imaging

Special Interests: Plain-film interpretations and informatics

Year Started Practicing at Emory: 1989

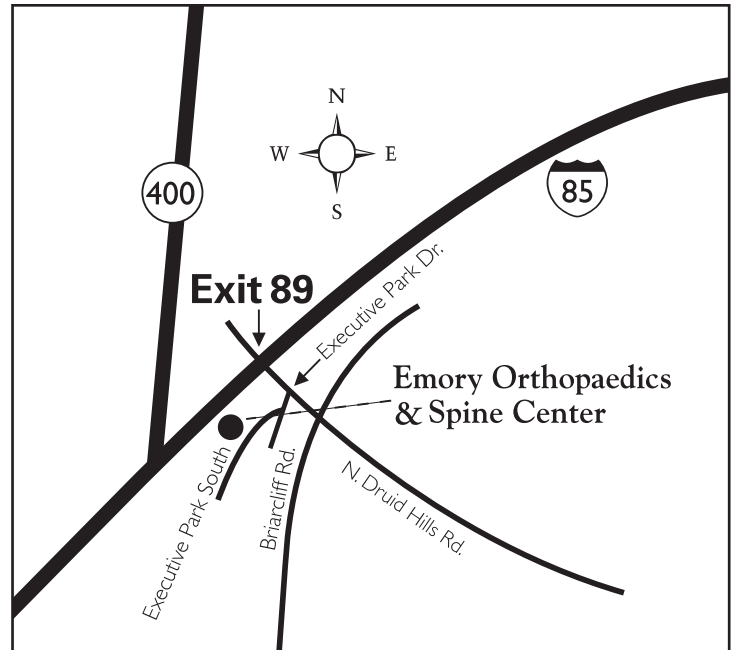

Terry Hudson, MD
Professor of Radiology, Emory University School of Medicine
 Medical School: Duke University
Internship & Residency: University of Florida, Shands Teaching Hospital
Fellowship: Hospital for Special Surgery, New York, N.Y.

Board Certified: Diagnostic radiology, subspecializing in musculoskeletal imaging

Special Interests: Bone tumors

Year Started Practicing at Emory: 1989

LOCATION/FACILITIES

Emory Musculoskeletal Radiology is conveniently located within the 95,000-square-foot Emory Orthopaedic & Spine Center in Atlanta's Executive Park.

DIRECTIONS

59 Executive Park South, Atlanta, Georgia 30329:
 From I-85 North or South, exit at North Druid Hills Road and turn east (toward Decatur). Turn right at the first light, just past I-85, into Executive Park. Inside Executive Park, continue straight for approximately 0.1 mile, then turn right on Executive Park South. We are one block ahead on the right (59 Executive Park South). Radiology is located on the fourth floor.
