

Emory Orthopedics and Emory Sports Medicine Center with Emory University School of Medicine presents

Emory's 6th Annual

Women's Sports and Wellness Conference and Health Summit

Join the Conversation! "BETTER TOGETHER"

Special Session on DIVERSITY, EQUITY, AND INCLUSION IN SPORTS

Saturday, August 10, 2024

IN-PERSON: Emory University School of Medicine
100 Woodruff Circle NE, Atlanta, Georgia 30322

VIRTUAL Registration Available

COURSE DESCRIPTION

Emory's 6th Annual Women's Sports and Wellness Conference will bring together thought leaders and healthcare experts from across disciplines who will present and discuss current and relevant topics affecting adult and young female athletes with a goal of empowering women and girls through sports and wellness. Join us for a special session on Diversity, Equity, and Inclusion in Sports.

We invite everyone to attend: healthcare professionals, athletes, coaches, learners, and all who are interested in the important topic of women and girls in sport. Come join the conversation! We are better together!

LEARNING OBJECTIVES

At the conclusion of this activity, the learner will gain an in-depth understanding of sports injuries and sports related conditions commonly seen in female athletes in all age groups including pediatric and adolescent athletes, collegiate and young adult athletes, athletes who are in midlife and beyond, and including athletes in special populations during pregnancy, post-partum and menopause.

The learner will increase the use of patient care plans that incorporate the input from a multi-disciplinary team including athletic trainers, physical therapists, sports medicine physicians, sports dietitians, and sports psychologists, to provide a comprehensive approach to treating sports injuries and sports related conditions commonly seen in female athletes.

As a result of the learner's understanding of common sports injuries and sports related conditions in female athletes, female athletes of all ages will benefit from a comprehensive approach to treatment to optimize recovery and prevent reinjury, which will allow female athletes to continue playing sports and doing activities they enjoy.
