

Order Submission Options

How community providers connect with Emory Healthcare (two options)

- [EpicCare Link \(Emory Healthcare Link / Digital Option\)](#): Secure web-based portal for electronic submission of orders/referrals/consents, real-time clinical visibility, and status tracking.
- **Fax Submission (Established Workflow)**: Fax-based submission remains available for practices using existing workflows for radiology, lab, referrals, and surgical requests/consents (and IV Therapy for non-credentialed providers). If you plan to use fax submission, please ensure your fax number(s) are updated in your EMR.
